Website Administrator Report – GTC AGM 2022

Overview

Since taking over from Alison, there has been a steady flow of GTC sponsor and general news. Setting up and welcoming new sponsors and members, promoting e-Workshops, adding our Zerb and InFocus publications etc. It has been, and continues to be, a learning curve, in regards to background knowledge of the GTC and sponsor products.

I am enjoying maintaining the website and look forward to working with the new council. Hopefully, now things are easing and opening up, finalising and publicising forthcoming GTC events, and developing areas of the website.

We have regular publishing meetings (myself, Simon Edwards, Roger Richards & Rob Emmanuel), which I personally find helpful and informative.

We are always looking for ways of improving the website so if any members have ideas on how we could make it better, please let me know.

Diablo

Diablo continue to provide technical assistance for the site, and maintain a test site to allow us to test new features and content before it goes live. The main area that we're working on with them at the moment is combining both the Sponsor and GTC news content, to make it easier to navigate and view. This is currently under testing with Diablo.

Thank you

I would like to take this opportunity to thank Ali for her patience and help in handing over the role and Simon, Roger and Rob for being understanding and supportive.
